

Telegraphic Address—

BARR, COVENT GARDEN, LONDON.

AUTUMN 1900.

BARR'S Gold Medal DAFFODILS.

BARR'S DAFFODILS have been awarded 11 Gold Medals, 29 Silver-Gilt Medals, 139 Silver Medals, and 4 Silver Cups, in addition to many Special Prizes, Bronze Medals, Certificates of Merit, &c.

NARCISSUS JOHNSTONI, 'QUEEN OF SPAIN' AND 'KING OF SPAIN,' ESTABLISHED IN GRASS AT THE FOOT OF A PEAR TREE IN AN OLD GARDEN.

Each clump contains now about 50 bulbs, the result of 6 or 8 bulbs planted in December 1892.

BARR & SONS,
11, 12 & 13 King Street, Covent Garden, London.

.....

Nurseries—LONG DITTON, SURREY, a few minutes from SURBITON STATION (S.W.R.). Visitors invited to the Nurseries during Spring, Summer, and Autumn to see BARR'S FAMOUS DAFFODILS, IRISES, PEONIES, SUNFLOWERS, MICHAELMAS DAISIES, and other HARDY HERBACEOUS, ALPINE, and BULBOUS PLANTS. The Rock and Aquatic Gardens are worth a visit.

Entered at Stationers' Hall.

All rights strictly reserved

Barr's Good Medal Daffodils.

BARR'S DAFFODILS.

THE FAVOURITE HARDY FLOWERS OF SPRING.

N. JOHNSTONI
QUEEN OF SPAIN.

DAFFODILS are the most graceful and beautiful of all Hardy Spring Garden Flowers, and withstand uninjured our severest winters better than any other flower. The cut blooms are always acceptable, and are in abundance out of doors at a season when other flowers are scarce. They supplement and associate admirably with hot-house flowers.

BARR'S DAFFODILS have been Awarded A MULTITUDE OF MEDALS (Gold, Silver-Gilt, and Silver), PRIZES AND CERTIFICATES, including the only GOLD MEDAL of the first Great Daffodil Conference of the Royal Horticultural Society, the GOLD MEDAL at Wolverhampton, 1896, the GOLD MEDAL at Wisbech, 1899, SILVER CUP at the Edinburgh Spring Show, 1900, SILVER MEDAL at the Birmingham Spring Show, 1900, and several SILVER and SILVER-GILT MEDALS at the London Spring Shows, 1900.

Numerous Awards and First-Class Certificates have also been given to individual varieties.

PRESS NOTICES OF BARR'S DAFFODILS.

Extract from 'The Daily News,' April 29, 1899.

'THE WORLD OF FLOWERS—AMONG THE DAFFODILS.'

'If you happen to go, by the London and South Western, down into Surrey, you pass almost immediately after leaving Surbiton a tract of land lying on your left, which causes you momentarily to doubt your own senses. Out of the sober green of the fields there flash upon you suddenly masses of such vivid glorious colours as you have never seen unless you have walked, at Easter-time, through Haarlem bulb-grounds or through Leyden tulip-gardens. For once the rate of speed on the L. and S.W. seems unnecessarily great. Before you have realised that you were in sight of the most famous daffodil grounds in the world, you are rumbling along again through neat green unexciting fields. But from Waterloo to Long Ditton is only half an hour's journey, and that Londoner is a wise man, or woman, who makes a point, during the next fortnight, of paying a special visit to the grounds of Messrs. Peter Barr & Sons. It is to Mr. Peter Barr that the name of Daffodil King was given, many years ago, by horticulturists, professional and amateur, for it is he who saw the wondrous beauty of the flower long before æsthetes and artists had made it fashionable; and when as yet only a few enthusiasts grew it somewhat shyly, and talked of it a little apologetically, Mr. Barr, year after year, climbed about the wilds of Spain, finding new daffodils on the slopes of the Pyrenees, and in the corners of Castille and other provinces where even now the foot of tourist has never trod. At the age of over seventy he set out, a year or two ago, for one of these exploring tours, and if he were not just now on a tour round the world, the Daffodil King would no doubt be in Spain, adding yet more recruits to that splendid légion d'honneur of his, which forms the finest part of his Daffodil army. Thus, after a lifetime among the bulbs, Mr. Barr has succeeded in bringing together the magnificent collection of some 600 varieties of daffodils. Go to Long Ditton and see them, that is the best advice to give to any one who would see one of the most magnificent sights which can be seen at present in and about London.

'As you catch the first glimpse of the grounds that seem to stretch for miles into the distance, you almost gasp. You had not realised that there were so many daffodils in the world, and here they are, in one corner of suburban London, flowing like a stream of gold, down, down, down, to Heaven knows where. Occasionally a great island of crimson, and flame-colour, and rose-pink, and creamy white interrupts this stream. These islands are the early tulips. There, under the shelter of the high bank, lies a square as of blue velvet; the grape-hyacinths are in full bloom. Then a stretch of cool, green tulip foliage; beyond, bed after bed of polyanthus, glowing like jewels. And after that, the daffodils. I am

under orders not to go into dithyrambics, nor to quote Wordsworth. These are cruel orders. Perhaps the next best thing is to quote Mr. Barr, jun., the guide through the daffodils.

"How many bulbs are there in the ground, here?" you ask, wondering if figures can express the prose aspect of these waves and billows of innocent gold. "I could hardly tell," says Mr. Barr; "at all events, some millions. There are 20,000 bulbs in this bed." Ye gods! And "this bed" is but a drop in the daffodil stream!

"Turn your attention to the individual flower. You never saw such daffodils. . . . These before you, in the 20,000 bed, are monsters for size, and marvels for loveliness of tint. "That is the Emperor," Mr. Barr tells you, "and is one of the finest of the trumpeters." . . .

"We wander on to another little bed of scores of thousands. This time the splendid yellows are toned down, the gold of the trumpet is a little paler, the tints of the perianth are shaded from pale gold to silver. "This is a new bicolor narcissus," is the explanation. "It is the VICTORIA, and only came into the market in Jubilee year. Hence its name." There is a dainty beauty, a kind of dream-daffodil, in shades of velvety gold and silver, a MADAME DE GRAAFF; a tiny, delicate cup of almost transparently clear yellow, QUEEN OF SPAIN; then, again, a splendid flower of various shades of gold named P. R. BARR; and score upon score of others each lovelier than all the rest. It is no use trying to picture up in mere words the perfect form of the silvery white SWAN'S NECK DAFFODIL, the BARRII CONSPICUUS, with its cup brimming over with burnished gold; the fragrance of the ODORUS RUGULOSUS, three twinkling stars growing on one stalk. The number of names becomes confusing, and you clutch, with somewhat of relief, at the three pretty double daffodils which the voice of the people (in prehistoric times, of course, for we would never have the genius of inventing names of such classic simplicity) dubbed respectively BUTTER AND EGGS, EGGS AND BACON, and CODLINS AND CREAM.

"Are there still single bulbs which, for their cost, remind you of the times when fortunes were paid for a rare bulb?" "Not exactly. We have a daffodil, the MONARCH, a large golden yellow trumpeter, which we sell at £15. 15s. a bulb. Who buys such? Why, enthusiasts. The cheapest daffodil is the NARCISSUS PRINCEPS, a fine early Irish flower; it sells at £1. 10s. the thousand."

"The show of daffodils, it may be noted, begins when, early in February, two small "trumpeters" begin to blow, and goes on till, in the middle of May, the PHEASANT'S EYE twinkles upon the early summer flowers. It is a pageant of great beauty all the time, but most beautiful at the end of April, when more shades of yellow than our philosophy dreams of are sported by the daffodils. And the best place, all the world over, to see a complete collection is in the grounds of Messrs. Barr & Sons, which are open to all comers, down at Long Ditton, Surrey."

Extract from 'The Westminster Budget,' May 4, 1900.

'A GOLDEN SURREY GARDEN.'

"The budding out-door world, even in London, is full of charm at the present moment. The parks, with their carpets of hyacinths, tulips, and daffodils, are never again, throughout the summer, as pretty as in the early days of May. The suburbs, with their well-kept front gardens, and their houses looking out among the delicate greenery of trees just in leaf, and fruit trees all in bloom, are at their best, and the serene charm and fascination of a typical English spring may now be enjoyed by one and all. And there is one sight, within easy reach of every Londoner, which adds a dash of gorgeous colour to the delicate tints of our own early spring. Half an hour from Waterloo by train lands you at Surbiton, in one of the greenest of green Surrey nooks. The very approach to the station is one mass of primroses, happily growing in the grass and moss of the sheltered banks. And ten minutes' walk from the station—any Surbitonian will show you the way—there lies a tract of golden country twenty acres in extent, and all the ore is the living, innocent gold of daffodils. By the score and score of thousands they stand there, on their long, lithe stems, their blossom-stars all twinkling and their yellow trumpets all blowing, in a grand symphony of rich colour, to herald in the spring. The amateur gardener who wishes to see the actual flowers with which, next autumn, in the bulb, to stock his garden, should now go down and choose from among the 300 varieties which the famous daffodil growers, Messrs. Barr and Sons, have in these grounds at Long Ditton. The choice is almost infinite, from the splendid great Emperor daffodil down to the dainty little Angel's Tears, and just now all the flowers are at their very best. Here and there among a bed of from 10,000 to 12,000 daffodils there flashes out a colony of early tulips like gigantic jewels scattered lavishly abroad. Again, there are banks and beds of the delicately scented grape-hyacinth, an exquisite flower too little appreciated as yet, the deep blue of which makes a welcome rest for eyes that have just been dazzled by the marvellous colour-scheme of daffodils and tulips. Messrs. Barr make all visitors to their gardens welcome, and we recommend as one of the most enjoyable of 'half-holidays' a trip to Surbiton during the next week or ten days."

CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

SOIL.—The Daffodil will thrive in any ordinary garden soil, but prefers a deep, rather moist loam. When the soil is of a dry sandy nature, it should be deeply dug, rotten stable manure should be added, and a potato or other crop taken off before planting. If this is not convenient, then place the manure at least 12 inches deep, so as to be out of the reach of the bulbs; the manure is used not as a stimulant but as a sponge to hold moisture in the soil. The ammoniacal properties of manure are injurious to the Daffodil, hence great care is necessary in the use of it.

FRESHLY DUG SOIL should be allowed to stand vacant two to three weeks before planting, to allow the ground to settle down, otherwise the freshly planted bulbs are often drawn under considerably below their proper depth, and the bloom in consequence is weakened and retarded.

BEST AND SAFEST MANURE TO USE is Crushed Bones or Basic Slag (for price see page 24). This should be applied at planting time, and may be mixed with the soil and placed next the bulbs; the Crushed Bones may be applied at the rate of 4 cwt. to the acre, or $1\frac{1}{2}$ oz. to the square yard, and Basic Slag may be applied in same manner at the rate of 1 ton to the acre, or $7\frac{1}{2}$ oz. to the square yard. *We recommend the Basic Slag in preference to the Crushed Bones, it being more reliable*, and a good manure for all lands; on very poor and DRY SANDY SOILS we recommend in addition SULPHATE OF POTASH (for price see page 24), to be sprinkled annually in the autumn over the surface of the ground, or after planting, at the rate of 2 cwt. to the acre, or about $\frac{3}{4}$ oz. to the square yard. The potash not only increases the depth of colour in the flowers, but also helps to hold the moisture in the soil, a condition so essential to the perfect development of the Daffodil.

IN EARLY SPRING, as soon as the Daffodils begin to show above ground, the surface soil should be well broken with a hoe, to sweeten it after the heavy winter rains.

PLANTING AND LIFTING.—The best time to plant to obtain the finest flowers is from end of August and during September, *although bulbs may be planted as late as Christmas with very satisfactory results*. They may be left undisturbed for three years in ordinary good loamy soils, but on poor and light soils they are better lifted every two years, as soon as the foliage has died down, and replanted as early as is convenient. Never plant when the ground is wet and sticky, wait until it is dry or friable. Do not put silver sand around the bulbs of Narcissi except in the case of *N. corbularia*.

DEPTH TO PLANT.—The average depth to plant is from 2 to 3 inches, that is to say, a covering of two to three inches of soil, but not more. As the bulbs vary considerably in size, according to the relative varieties, the best rule to go by is the bulb itself, which should be *covered with soil once and a half its own depth*, measuring the bulb from the collar of its neck to its actual base.

POSITION AND GROUPING FOR EFFECT.—All Daffodils prefer partial shade, although most of them will grow equally well in the open. The varieties which are best grown in partial shade are indicated in the following pages by a *. In the flower border, to obtain the best effect, Daffodils should be planted in large groups of irregular outline, each group or clump to contain one variety only; avoid straight lines, circles, and symmetrical designs. Masses of Daffodils should always appear in the Hardy Flower border, where irregular and effective sweeps can be planted between the clumps of herbaceous plants which in their turn grow up and hide as well as shelter the Daffodil foliage while it is going to rest. In grouping, the season of flowering should be borne in mind, as the varieties bloom in succession from the end of February to the end of May, during which period a constant succession of flower is obtainable by a judicious arrangement. In the following pages we denote the rotation of blooming. (See page 9.)

VARIETIES SPECIALLY SUITABLE FOR NATURALISING IN GRASS, WOODLANDS, &c.—These are all free seeders, and will therefore spread naturally; they are mostly natural hybrids—*Abcissus*, *Achilles*, *Countess of Annesley*, *Golden Spur*, *Henry Irving*, *Obvallaris*, *Spurius*, *Thomas Moore*, *English Lent Lily*, *Princeps*, *Scoticus*, *Variiformis*, *Albicans*, *Pallidus Præcox*, *Moschatus* of *Haworth* (very pretty in grass), and *Poeticus* of the Pyrenees. THE VARIETIES UNDERLINED we do not recommend for the cultivated border, as they deteriorate the second year, while in grass or meadowland they flourish.

HINTS ON NATURALISING IN GRASS.—All daffodils may be planted in grass with perfect success. To produce the best effect the three groups should be kept separate: thus the *Star Narcissi* should not be mixed with the *Great Trumpets*, nor the *Poet's Narcissi* with the *Star Narcissi*. In arranging, make the breaks large and bold, scattering the bulbs over the ground broadcast with the hand, and dibbling into the ground where they fall. Avoid symmetrical lines or formal circles as far as possible, as these are never found in nature.

METHOD OF PLANTING IN GRASS.—Take a stout wooden dibber (like a potato dibber) with a strong tread; make the hole in the ground about six or seven inches deep, and fill up with a good mixture of prepared soil consisting of two-thirds loam and one-third old leaf soil; into this press the bulb, and cover up the hole with same compost; this will give the bulbs a fair start, and success is sure to follow. In planting under trees, avoid places where the drip from the branches is greatest, also where the main roots come close to the surface. (For price of *Special Dibber*, see page 24.)

CULTURE INDOORS IN POTS, &c.

DAFFODILS GROWING IN A BOWL OF COCOA FIBRE.

as near to the glass as possible, and not allowed to get drawn from an insufficient supply of light or air. On no account should bottom heat be given.

A charming effect is obtained by growing Daffodils in fancy bowls, simply using cocoa fibre or our Special Mixture of Cocoa Fibre and Charcoal (*see General Bulb Catalogue*). (*See Illustration.*) Fill the bowls one-third up with fibre, then insert the bulbs and fill up nearly to the top with fibre. Give sufficient water to make the whole firm, and after that simply keep the fibre *moderately* damp. Should the material and bulbs lift owing to root action, simply press them down gently and evenly into the bowl. Daffodils may be grown successfully in this way in a cool greenhouse or sitting-room window (by preference a room without a fire). They should be grown cool, and not brought into warmth until the flower buds are colouring. *For price of suitable bowls for this purpose, see page 24.*

ON CUTTING DAFFODILS FOR DECORATION.

To obtain very fine blooms Daffodils should be cut in a young state, just when the bud has well broken, and is expanding from the spathe. Place in water and allow the flowers to open in a cool greenhouse or sitting room. The blooms opened in this way are larger than those which develop out of doors.

DAFFODIL COLOURED PLATES.

These Daffodil Plates can be had, post-free, at the following charges—

- (A) Two large Uncoloured Illustrations—one representing a Group of Yellow Trumpet Daffodils, and the other a group of White Trumpet Daffodils, *drawn and arranged for the 'Gardeners' Chronicle' by Agnes Barr.* The two Plates for 1s.
- (B) Coloured Plate of Daffodils, representing *Incomparabilis Gloria Mundi, Incomparabilis Princess Mary, and Leedsii Beatrice.* 1s.
- (C) Coloured Plate of Daffodils, representing a Group of *Pöiticus* and *Burbidgei* varieties. 1s.
- (D) Coloured Plate of a Group of Daffodils, including *Cernuus pulcher, Johnstoni Queen of Spain, Bicolor J. B. M. Camm, Leedsii Superbus, Nelsoni* varieties, &c. 1s.
- (E) Coloured Plate of a Group of Daffodils, including *Barrii conspicuus, Triandrus albus, Leedsii Mrs. Langtry, Bicolor J. B. M. Camm, Johnstoni Queen of Spain, Cyclaminus, and Minimus.* 1s.
- (F) Coloured Plate of a Group of Barr's Beautiful New Daffodil 'Queen of Spain.' 6d.
- (G) Coloured Plate of Daffodil *Incomparabilis Sir Watkin.* 6d.
- (H) Coloured Plate of Daffodils *Madame De Graaff* and *Apricot.* 6d.
- (I) Coloured Plate of Daffodils *Weardale Perfection, Monarch, and Lutworth.* 6d.

A COMPLETE SET OF THE ABOVE PLATES SENT, POST-PAID, FOR 5s. 6d.

'YE NARCISSUS or DAFFODYL.' By PETER BARR and F. W. BURBIDGE.

A few copies still remain of 'Ye Daffodyl,' price 1s. This is a record of the First Daffodil Conference, 1884, and contains a great deal of very interesting matter connected with the History and Literature of the Daffodil, with notes on culture and hybridisation; also, a complete descriptive list of all Daffodils, ancient and modern, known up to 1884.

SELECTIONS OF

Barr's Beautiful Daffodils

FOR AMATEURS.

BARR'S Popular 21/- Collection of High Class DAFFODILS,

Consisting of the following fine distinct varieties, selected from Groups I., II., and III., and suitable either for pot-culture, for the flower border, or to naturalise in grass &c.

3 Golden Spur	3 William Goldring	3 Barrii conspicuus
3 Henry Irving	3 W. P. Milner	3 „ Flora Wilson
3 Johnstoni Queen of Spain	3 Incomparabilis Gwyther	3 Leedsii Mrs. Langtry
(See Illustration, page 1)	3 „ King of the Netherlands	3 „ Minnie Hume

BARR'S CHEAP DECORATIVE DAFFODILS FOR CUTTING.

BARR'S CHEAP MIXTURES OF DAFFODILS.

CHOICE MIXED DAFFODILS OF MANY SORTS for naturalisation, per 1000, 35/-

FINE	"	"	"	"	"	"
	"	"	"	"	"	"
	"	"	"	"	"	"

PEERLESS DAFFODILS, or CHALICE-CUPPED STAR NARCISSI, MIXED
(*Incomparabilis*, *Barrii*, and *Leedsii* varieties) for naturalisation in grass, &c. The grand effect of these light graceful Daffodils must be seen to be realised as naturalised plants. Their value as cut flowers for bouquets and vases cannot be over-estimated. *Mr. William Robinson has made a great feature of these at Gravetye Manor, East Grinstead*per 1000, 35/-; per 100, 4/-.

TRUMPET DAFFODILS, MIXED, including Princeps, Abscissus, Rugilobus, Lent Lily, Telamonius plenus, &c. &c., for naturalisation, per 1000, 42/-; per 100, 5/-.

POET'S DAFFODILS, or SMALL-CUPPED STAR NARCISSI, IN MIXTURE,
including early flowering Poeticus and varieties of Burbidge, for naturalisation in grass, &c.
For cutting, the flowers are greatly prized. Of these Poet's Narcissi Mr. William Robinson writes,
referring to Gravetye: 'Five years ago I cleared a little valley of various fenees. Through this runs
a streamlet, and we grouped the Poet's Narcissus near it, and in a little orchard that lay near, and
through a grove of oaks. This year the whole landscape was a picture, such as one might see in an
Alpine valley'.....per 1000, 42/-; per 100, 5/-.

**BARR'S 'ROCK GARDEN' COLLECTIONS OF MINIATURE
DAFFODILS.**

The following are charming little subjects for rockwork, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. All the *Corbularias* (except *Corbularia monophylla*) like moisture, and should therefore be planted at the foot of the rockery. *Cyclamineus* also likes moisture and partial shade. *Corbularia monophylla* flourishes in a warm dry sheltered situation, and should be given a hot sunny nook, planted in almost pure sand; when coming into bloom give water freely. *Triandrus albus* (*Angel's Tears*) and *Juncifolius* delight in partial shade and a light gritty soil, and should be given a well-drained position such as a sloping bank. In the case of these slender dwarf-growing *Miniature* Daffodils, the ground may be carpeted with close-growing surface rooting plants, such as *Arenaria caespitosa*, *Thymus serpyllum* vars. *T. lanuginosus*, *Herniaria glabra*, *Mossy Saxifragas*, &c.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed and soiled in rainy weather. We prefer, however, seeing these little gems peeping out of grass, and where special banks are made or reserved for them we can supply seed of suitable fine dwarf grasses for sowing in September after planting the bulbs; this sowing will give a fine green carpet by the following spring, when the *Narcissi* bloom.

20 Bulbs each of the above 13 Miniature Daffodils, 38/-; 12 of each, 25/-; 6 of each, 13/-; 3 of each, 7/-.

Good Water-colour Paintings of any Daffodils can be supplied (to order) during the Daffodil flowering season at the rate of 7s. 6d. per bloom.

Orders should be given early.

Beautiful New Daffodils of 1899 and 1900.

Including the Rev. G. H. Engleheart's Famous Seedlings.

The following varieties of Daffodils are some of the best of the recently raised seedlings, and purchasers cannot fail to be pleased with them. In point of quality they all rank high, while a robust healthy constitution renders them additionally valuable. They will well repay a *good culture* by the size and beauty of their flowers, and should therefore be planted in a good deep loamy soil.

For GIANT TRUMPETS we can strongly recommend *Big Ben* and *Duke of Bedford*, while *Maggie May* may be termed the QUEEN OF THE LEEDSII SECTION for its size, grace, and beauty.

In italics we give the name of the introducer.

The varieties marked † are suitable for pots as well as for the border.

ALMIRA (Poëticus) , a beautiful Poet's Narcissus, with broad rounded white perianth of fine substance, and cup margined deep red	each per doz. 15s.	15s. 6d.
BIFLORUS FROM MONTEPELLIER , a very interesting form of <i>Biflorus</i> , collected by Mr. PETER BARR a few years ago; it is many-flowered, and the blooms are larger than, and distinct from, the ordinary type		3s. 6d.
† BIG BEN (Barr) , ONE OF THE LARGEST OF TRUMPET DAFFODILS, the flowers measuring about five inches across, perianth primrose, trumpet yellow, of good form and substance; a strong grower and free seeder; for hybridising this should prove a valuable variety	£10. 10s.	
† BLANCHE (Burbidgei) (Barr) , large white perianth and small primrose-yellow cup, distinct and pretty	5s. 6d.	
CASSANDRA (Poëticus) (Engleheart) , a noble and gigantic Poet's Narcissus of tall and vigorous growth; flowers of fine substance, with broad wide-spreading clear white perianth, cup deeply-rimmed dark red. <i>Award of Merit R.H.S.</i>	£2. 2s.	
CECILY HILL (Barrii) (Backhouse) , a beautiful flower, with fine stiff perianth of a soft primrose flushed yellow at base, cup yellow, flushed orange-red, and edged cinnabar-red, late-flowering	10s. 6d.	
CLOTH OF GOLD (Tridymus) , the finest of the <i>Tridymus</i> section, each stem bearing three sweetly-scented flowers, perianth rich yellow, cup deep golden; a robust grower, and free bloomer	10s. 6d.	
CONSTELLATION (Incomparabilis) , a beautiful flower with large white perianth and bright yellow cup prettily crimped at brim, and margined orange; tall strong grower	7s. 6d.	
† DR. FELL (Barrii) (Backhouse) , perianth whitish, cup orange-scarlet, a valuable acquisition for pot-culture under glass, being very early flowering. It is not suitable for the border, the flower-buds being so early are liable to suffer from frost. Very showy variety when forced	per doz. 12/-	15s. 3d.
† DUKE OF BEDFORD (Bicolor) (Barr) , a magnificent flower, measuring 4½ inches across; perianth pure white, broad and of great size, trumpet clear soft yellow, very large and of fine substance and form, measuring 2½ inches across at the mouth; it flowers very early, opening before <i>Horsfieldii</i> , and has a pleasing fragrance. <i>Awarded</i> , during Spring, 1899, <i>First-Class Certificate</i> , Birmingham; <i>First-Class Certificate</i> , Edinburgh; <i>First-Class Certificate</i> , Wisbech; <i>Award of Merit R.H.S.</i>	£12. 12s.	
FIRE GLOW (Incomparabilis) (Barr) , perianth snow-white, cup glowing crimson, colour lasting well in the sun	£1. 1s.	
FRILLED BEAUTY (Barr) , colour of flower a lovely uniform pale sulphur-yellow, mouth of trumpet being very beautifully frilled; an early bloomer and free seeder	£2. 2s.	
HARBINGER (Barr) , one of the first Trumpet Daffodils to open, of pretty form and medium size, perianth sulphur, trumpet yellow	15s. 6d.	
† HILLSIDE DAFFODIL , a handsome rich golden-yellow early flowering Daffodil, with large broadly-expanded trumpet gauffered at mouth	10s. 6d.	

† KING ALFRED (<i>Kendal</i>), a remarkably handsome Daffodil of large size and great substance, colour a uniform clear deep golden; trumpet large and of elegant form, with open deeply-frilled mouth; a flower of refined finish; tall vigorous grower. <i>First-Class Certificate R.H.S.</i> , 1899	each. £6. 6s.
† LADY GODIYA (<i>Barri</i>), a pretty white sport from <i>Barri Conspicuous</i> , having a white instead of yellow perianth	2s. 6d.
LADY WILLES , perianth primrose-yellow, bold yellow trumpet deeply flanged and open at mouth; a strong and rather dwarf growing new Trumpet Daffodil	3s. 6d.
† LOBSTER (<i>Incomparabilis</i>) (<i>Engleheart</i>), large yellow perianth, cup large, and heavily stained brilliant orange-red, which deepens in the sun; remarkably showy and handsome, tall vigorous grower, and very free bloomer	£3. 3s.
† LOUISE (<i>Nelsoni</i>), a handsome flower of great substance, with broad round white perianth, and bold canary-yellow cup prettily crimped at margin, and slightly tinged orange	5s. 6d.
LUCIFER (<i>Incomparabilis</i>) (<i>Engleheart</i>), pale perianth and glowing orange-red cup, colour lasting well in the sun, very striking, a good lasting flower	10s. 6d.
MAGGIE MAY (<i>syn. Edmond's White</i>), the most beautiful Daffodil of the <i>Leedsii</i> section yet raised; flowers of great size, with broad spreading white perianth and very large pale citron cup beautifully frilled; a fine strong grower. <i>First Class Certificate R.H.S.</i> ; <i>First Class Certificate</i> , Birmingham; (See Illustration, page 18)	£15. 15s.
MAXIMUS OF THE PYRENEES , a freer and earlier bloomer and of a richer colour than the old cultivated variety; after some years of cultivation, however, it is almost undistinguishable from the latter.....per 100, 50/-; per doz. 7/6	8d.
ODORUS CAMPERNELLI PLENUS , a very interesting variety, bearing several characteristic double yellow flowers of elegant form, on tall graceful stems, sweetly scented	7s. 6d.
† PERFECTUS (<i>Nelsoni</i>), a flower of great substance and charming symmetry, having a well-formed stiff white perianth and expanded canary-yellow cup faintly tinged orange.....	5s. 6d.
POETICUS TWIN-FLOWERED , a pretty seedling variety, invariably bearing two flowers on a stem	2s. 6d.
† RAY SMITH (<i>Barr</i>), a uniform rich yellow trumpet Daffodil, distinct and elegant in form, perianth gracefully twisted and tapering to a point; a strong grower with broad deep glaucous foliage, very handsome	7s. 6d.
RED COAT (<i>Incomparabilis</i>) (<i>Backhouse</i>), a remarkable variety, having an orange glow in the yellow perianth, cup orange-red, crenulated at brim; this is the first sign of a break of orange-red in the perianth of any seedling yet raised.....	10s. 6d.
ST. PATRICK (<i>Tridymus</i>), bearing three flowers on a stem, perianth soft yellow, cup rich deep golden, a fine handsome variety, robust grower and free bloomer.....	10s. 6d.
† SENTINEL (<i>Bicolor</i>) (<i>Barr</i>), broad erect spreading perianth of a pure white, with short clear yellow trumpet, expanded and flanged at mouth, strong grower, flowers just topping the foliage, a very effective and desirable variety	2s. 6d.
† SEQUIN (<i>Burbidgei</i>) (<i>Engleheart</i>), a very distinct and beautiful new seedling, with solid snowy white perianth and very large broad golden cup flattened against the perianth like a golden coin; strong healthy grower	10s. 6d.
† STELLA superba (<i>Incomparabilis</i>), a grand bold flower, far superior to <i>Incomparabilis Stella</i> , flowers more than twice the size, with large clear white spreading perianth and a showy yellow cup; it is a strong grower and excellent for cutting, having a long stem. (See Illustration in 1899 Daffodil Catalogue)per doz. 9/-	10d.
THE TWINS (<i>Tridymus</i>) (<i>Barr</i>), a pretty two-flowered variety, perianth creamy white, bold rich yellow cup of fine substance, violet-scented; a good grower of robust habit	£1. 1s.
UNA (<i>Leedsii</i>) (<i>Engleheart</i>), a flower of great size, with large creamy white perianth, and long straight crown, of a bright citron tinged apricot; a very vigorous grower in good deep soil	£7. 7s.
† WILLIE BARR , a handsome Trumpet Daffodil, perianth clear soft yellow of fine campanulate form and good substance, trumpet rich deep yellow with elegant brim; strong sturdy grower	per doz. 30/- 2s. 9d.

1 Bulb each of the above-named 34 handsome New Daffodils, £65.

General List of Barr's Daffodils.

The following list of Daffodils embraces the highest class, and most distinct varieties, surpassing in beauty and diversity all other assortments offered to the public. They represent the cream of our Collection (over 500 kinds), and include the pick of all the newest varieties up to 1900, many of which are offered to the public for the first time this season. Within the last few years we have discarded many of the older kinds which we considered had been superseded by better sorts, so that all the varieties offered by us are good and distinct.

THE ORDER OF TIME OF FLOWERING.

The relative period of flowering of the different varieties and species out of doors we have denoted by means of numbers after the names, thus:

- (1) 1st early, flowering from February to early March.
- (2) 2nd early, flowering in March.
- (3) Varieties flowering in mid-season, or early in April.
- (4) Late-flowering varieties, from middle to end of April.
- (5) Very late-flowering varieties, opening in May.

The actual period of blooming depends upon the season and district; thus in early districts (1) would commence in January and early February, while in colder districts end of February or beginning of March; but the natural rotation would remain the same.

FOR ALPHABETICAL INDEX of all the varieties offered in the following list, see page 2 of Cover.

 The varieties marked thus * thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

 † indicates those kinds which should be selected where Daffodils are grown in pots.

 § indicates those Daffodils which, besides being fine border plants, make a pretty effect when naturalised in grass; they are all strong growers and free bloomers.

THE ILLUSTRATIONS we give are from Photographs taken at our Daffodil Nurseries, and are intended principally to give a general idea of the form of the flower.

DAFFODILS.—GROUP I.—MAGNI-CORONATI (Baker).

AJAX of Salisbury, Haworth, and Herbert, PSEUDO-NARCISSUS of Parkinson.

THE LARGE-CROWNED or TRUMPET DAFFODILS, INCLUDING ALSO THE HOOP-PETTICOAT OR MEDUSA'S TRUMPET DAFFODILS (CORBULARIA OR BULBOCODIUM).

DISTINGUISHING CHARACTER.—Crown or Trumpet as long or rather longer than the perianth segments.

NARCISSUS CORBULARIA (BULBOCODIUM).

The Hoop-Petticoat, or Medusa's Trumpet Daffodils.

For rockwork, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration. See *Cultural Notes*, pp. 3 & 4.

‡ *JOHNSTONI QUEEN OF SPAIN (2), found by Mr. Peter Barr in Spain. One of the most beautiful, distinct and graceful Daffodils in cultivation, and for bedding unsurpassed. The flowers, which barely rise above the foliage, are of a uniform soft delicate clear yellow, with a gracefully reflexing perianth and straight trumpet of distinct and elegant form; the flowers vary slightly in size, and a few <i>King of Spain</i> may be found amongst them, as in their native habitat the two grow together. Awarded Floral Certificate at the Daffodil Conference, 1896. Visitors to the Royal Botanic Gardens, Regent's Park, during the Spring of 1897, 1898, 1899, and 1900 have been charmed with the effect produced by large masses of this beautiful Daffodil, naturalised in grass beneath the trees. Bicolor Trumpet Daffodils—continued.

†**VICTORIA**, new 1897 (4), a grand new Trumpet Daffodil, exhibited by us for the first time, 1897, and highly appreciated by all. The Daffodil Committee of the R.H.S. gave it an *Award of Merit*, April 27, 1897, and the Royal Botanic Society awarded it a *Certificate of Merit*, March 30, 1897. The flowers are large, bold and erect, with creamy white perianth of remarkable breadth and good quality; the trumpet is a clear rich yellow, large, broad and of great substance, beautifully flanged and frilled at mouth. When flowered under glass the perianth is of a snowy whiteness; for pot-work it is the king of daffodils. It is a very free strong grower. (See *Illustration in our 1898 Catalogue*) 25 0...2 3

†**WEARDALE PERFECTION** (4), one of the largest and grandest of all Daffodils, and at the same time a flower of refined beauty; it has a large white perianth, and a very pale primrose trumpet of immense size. Awarded 1st Class *Certificate* by the R.H.S. 1894, and the *Premier Prize* as being the 'Finest Daffodil' at the Birmingham Narcissus Show, 1894, and *Floral Certificate* at the Daffodil Conference, 1896. At the Midland Daffodil Society's Show, April 26, 1900, some blooms of this Narcissus were exhibited measuring five inches across. (SEE ILLUSTRATION page 17).....each, £10 10s.

TRUMPET DAFFODILS. White and Sulphur-coloured Varieties.

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone-meal or basic slag may be used (for full directions, see page 3). The varieties marked thus * require shade; they all prefer a north-west aspect.

DAFFODILS.—GROUP II.—MEDIO-CORONATI (of Baker).

The Chalice-Cupped Daffodils or Star Narcissi.

QUELTIA, PHILOGYNE, GANYMEDES, &C., OF SALISBURY, HAWORTH, AND HERBERT;
PEERLESS, NONSUCH, &C., OF PARKINSON.

The varieties of this group are hybrids, excepting *Triandrus* and *Juncifolius*, which are species. *Incomparabilis* and *Barrii* are the result of garden crosses between yellow Trumpet Daffodils and *Narcissus Poeticus*; *Leedsii*, a garden cross between White Trumpet Daffodils and *Poeticus*; *Backhousei*, *Nelsoni* and *Macleanii*, the result of a Trumpet Bicolor var. crossed with *Poeticus*; *Bernardi*, a natural cross between *Albiscissus* (trumpet) Daffodil and *Poeticus*; *Tridymus* is a garden hybrid between a Trumpet Daffodil and a Tazetta or *Polyanthus Narcissus*; *Olorus*, a natural hybrid between a Trumpet Daffodil and *Narcissus Jonquilla*; *Biflorus* is the result of a natural cross between *Narcissus Tazetta* and *Poeticus*.

The varieties in this group commence flowering in March, and furnish a succession till May. They are all of elegant beauty, and as cut flowers, are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (see page 4).

☞ The varieties marked thus * are not suitable for all cultivated borders, but thrive best under the shade of deciduous trees such as fruit trees, &c., naturalised in grass in shady nooks, or on grassy slopes facing north or north-west.

NARCISSUS INCOMPARABILIS.

DISTINGUISHING CHARACTER.—Crown or cup half as long as the perianth segments, but in one or two cases three-quarters as long.

The Chalice-Cupped Daffodils or Star Narcissi.

All these make charming pot-plants, while the cut flowers are of great value in decoration. For beds and borders they are very showy, and naturalised in grass few flowers are so graceful and effective. It is well to bear in mind that the depth of colouring in the cup varies according to seasons.

NARCISSUS INCOMPARABILIS (DOUBLE).

The Double-flowered Nonsuch and Peerless Daffodils.

The large massive flowers of these are greatly prized for bouquets and vases, mixing well with other flowers and foliage in decoration. As pot plants (three to six bulbs in a pot) they are very charming, while in beds, borders, or naturalised, they make a most effective display.

		per doz. each.

Narcissus Weardale Perfection.

One of the largest and grandest of all Daffodils, and at the same time a flower of refined beauty; it has a large white perianth and a very pale primrose trumpet of immense size. At the Midland Daffodil Society's Show, April 25, 1900, some blooms of this Narcissus were exhibited, measuring 5 inches across, and formed a great feature of attraction. (See page 13.)

Reproduced from Photograph taken at Barr & Sons' Nurseries. (Copyright.)

Narcissus Leedsii Maggie May (syn. Edmonds' White).

The largest and most beautiful Daffodil of the *Leedsii* section yet raised ; flowers of great size with broad spreading white perianth and very large pale citron cup, beautifully frilled ; a fine strong grower. *First Class Certificate R.H.S.* and at the *Midland Daffodil Society's Show, Birmingham.* (See page 8.)

NARCISSUS BARRII.

DISTINGUISHING CHARACTER.—Perianth segments twice or more the length of the short expanded cup or crown.

Star Narcissi with Shortened Chalice Cup.

The beauty of these Narcissi renders them of great value for indoor decoration (3 or 5 bulbs in a 5-inch pot), while for beds, borders, naturalisation, and as cut flowers they are very highly prized.

CECILY HILL. See *New Daffodils*, page 7.

†**CONSPICUUS** (4), a flower of great beauty and refinement, and a favourite with all, large broad spreading yellow perianth, broad short cup, conspicuously edged bright orange-scarlet, *extra fine*, 1st Class Certificate, R.H.S. We can highly recommend this variety to every one as it is certainly the **Queen of Daffodils**, and lasts longer in water when cut than almost any other variety; it is a robust strong grower and a very free bloomer. (See *Illustration in our 1898 Catalogue*)

NARCISSUS LEEDSII.

The Silver Star Narcissi, or the Eucharis-flowered Fragrant White Daffodils.

DISTINGUISHING CHARACTER.—Shape of flowers resembling *N. incomparabilis* and *N. barrii* Sections, but differing in the colour of the cup or crown, which is either pure white or of a pale lemon shade passing off white.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders, and naturalised, they are most charming.

A charming and elegant little species for pots (*see page 4*) or for select spots on rockwork.

- †**JUNCIFOLIUS** (4), a slender-growing dwarf species, with small graceful rich yellow flowers, about the size of a buttercup, with a perfectly flat little crown, height 3 to 4 inches, flowers delicately fragrant, a native of the Pyreneesper 100, 6/6 1 0... ..

DAFFODILS.—GROUP III.—PARYI-CORONATI (Baker).**THE SMALL-CROWNED DAFFODIL or TRUE NARCISSUS.**

DISTINGUISHING CHARACTER.—Crown less than half as long as the divisions of the perianth.

In this series, *Poëticus* (the Poet's Daffodil) is the flower popularly called the **Narcissus**; *Burbidgei* is a hybrid between *Incomparabilis* and *Poëticus*, and is the connecting link between Groups II. and III. *Riflorus* is Parkinson's Primrose-Peerless, a hybrid of *Tazetta* and *Poëticus*. *Gracilis* and *Tenuior* are the Helena of Haworth; *Jonquil* the Jonquilla of Linnæus; *Polyanthus Narcissus*, the Hermione of Haworth and *Tazetta* of Sibthorp.

NARCISSUS BURBIDGEI.**Hybrid Poet's Daffodils or Star Narcissi.**

These with their light and graceful habit and beautiful blossoms are much valued as pot-plants (3 to 6 in a pot), and for vases, bouquets, and buttonholes; in beds and borders they are specially attractive, while naturalised in grass few plants are so beautiful.

The **Burbidgei Narcissi** differ from *N. Poëticus* in the cup of the flower being a trifle longer; the early forms commence flowering before *Poëticus ornatus*, and continue flowering in succession, one variety after another, from March to the middle of May.

- ‡**BURBIDGEI** (3), perianth clear white, cup margined with cinnabar-red, *very early*, and much prized for cuttingper 1000, 25/-; per 100, 3/- per doz. each

NARCISSUS POËTICUS.

The Purple-ringed Poet's Daffodil or Star Narcissus.

Poëtleus divides naturally into *early* and *late*-flowering varieties. It is from the early section, especially Poëtleus ornatus, that Covent Garden is supplied with forced cut flowers from January to March.

Referring to the great beauty of these Poet's Daffodils when naturalised, Mr. William Robinson writes: 'Four years ago I cleared a little valley of various fences. Through this runs a streamlet, and we grouped the Poet's Narcissi near it, also in a little orchard that lay near, and through a grove of oaks. This year the whole landscape was a picture such as one might see in an Alpine valley.'

March and April Early-flowering Section.

Very beautiful for indoors, 5 bulbs in a 4- or 5-inch pot. Charming in beds and borders, while naturalised in grass, they present in spring a most lovely sight.

		per doz.	each.

Fancy Decorated Japanese Bowls, suitable for growing Daffodils in: 7 in. diameter, 1s. 6d.; 8½ in. dia. 2s. 9d.; 9½ in. dia. 3s. 9d.; 10¾ in. dia. 5s. 6d.; 12 in. dia. 7s. 6d. each.

Special Notices.

Orders.

We shall esteem it a favour if our Customers will kindly use the Order Sheet that accompanies this Catalogue, and be particular to fill in the full postal and rail address, as sometimes Orders reach us without either name or address, and it is impossible to trace the senders.

Free Carriage of Bulbs.

All **Prepaid Orders** for Bulbs, over 5s. in value, will be sent **Carriage Paid**. Orders not prepaid, if over 10s. in value, carriage may be deducted at settlement of account.

Prepaid Orders. Cash Discount 5 per cent.

Besides sending **Prepaid Orders** 'Carriage Paid,' we allow **1s. in the £** (with exception of the special Collections offered on pp. 5 and 6, *which are strictly nett*), which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the Order.

1s. in the £ discount may be deducted from all accounts (excepting collections) when paid within 14 days from date of invoice. Accounts due nett Christmas and Midsummer.

Remittances.

Money Orders and Postal Orders to be made payable at Covent Garden Post Office; these and all Cheques should be crossed 'London and County Bank.' Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.

Packages.

Boxes, Bags, &c., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and a notification should be sent by post, stating date of despatch and name of Railway Company.*

Catalogues.

Our **Seed Guide**, containing a full descriptive list of our matchless Flower and Vegetable Seeds, is published in January, **Spring Bulb Catalogue** in January, **Hardy Plant Catalogue** in February, **Daffodil and General Bulb Catalogues** in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Daffodil Notices.

Our Nurseries, Long Ditton.

Visitors invited during Spring to see our magnificent Collection of Daffodils in bloom (*see Illustration on Back Cover*). The Nurseries are situated within a mile of **Surbiton Station** on the London and South-Western Railway. Cabs are always to be had at Surbiton Station.

Cut Daffodil Flowers.

When in bloom out-of-doors, cut specimens of Daffodils, correctly named, we forward post-paid at a moderate charge, to cover attendant expenses, thus offering a good opportunity to those who wish to extend their knowledge of these lovely flowers of Spring. If a list of the varieties possessed by the sender is enclosed, such sorts will be omitted. *A remittance should accompany the order.*

1 flower each of 12 sorts, 1/6; 1 each of 25 sorts, 3/6; 1 each of 50 sorts, 6/-
3 flowers „ 12 „ 3/-; 3 „ 25 „ 5/6; 3 „ 50 „ 10/6

Cut Daffodil flowers (without names) in variety, for decoration, 4/6, 5/6, & 7/6 per 100.

Naming Daffodils.

Cut specimens of Daffodils we undertake to name correctly, at the charge of 4d. each, 2s. per dozen, to cover attendant expenses. Address all cut specimens to be named, accompanied by a remittance, to our Nurseries, Long Ditton, Surrey.

Daffodil Prizes.

Particulars of **Competitions, Spring 1901**, for Barr's Silver Daffodil Cups, will be sent on application.

Notices to Our Foreign and Colonial Correspondents.

Prepayment necessary.

Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an 'order to pay'* on a London Bank, or Agent; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

Particulars of Freight.

Australia and New Zealand, per Parcel Post at 6d. per lb. (1s. being charged for the first lb.), or per 'Eastern Express,' at 6d. per lb. (minimum 2s.) We recommend the **Parcel Post** to be used where possible, parcels thus sent being delivered at the Customer's house quicker, and without any additional charges.

India.—Seeds and Bulbs can be despatched to all postal towns in India, by Parcel Post, at the rate of 1 lb. for 1s.; 2 lbs. for 1s. 8d.; 3 lbs. 2s. 4d.; 7 lbs. 3s. 6d.; 11 lbs. 5s.; or by 'Eastern Express,' at 6d. per lb. up to 30 lbs., after 30 lbs. cheaper as cargo.

Shipping, &c.

In **Shipping Bulbs and Plants** to Australia, New Zealand, America, India, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies extends over a long period.
